

TAKE THE LYME ENERGY COMMITTEE 20% CHALLENGE

Reduce Your Heating Footprint.

Use this chart to record your monthly use and cost of heating fuel, beginning with last year's amounts if fuel bills are available. Adopt conservation measures and try to reduce your usage by 20% or more from last year.

ANNUAL									
TOTAL									

To calculate the carbon footprint of your heating fuel, multiply annual total by one of the following:

Natural gas = 12.0593 lbs. of CO₂/CCF or 11.708 lbs. of CO₂/Therm,

Oil = 22.384 lbs. of CO₂/Gallon,

Propane = 12.669 lbs. of CO₂/Gallon.

Annual total of CFFs, Therms, or Gallons _____ X lbs CO₂/unit _____ =
_____, your CO₂ heating footprint
