Pine Tree Removal from Old Cemetery:

Reviewed meeting with Jim Henderson and his recommendations to remove three large pines in the Old Cemetery that are dead and actively dying. Laurie and Laurel met with Tami Dowd and her husband to view proposed site for removing trees which is on the Dowd's Inn property. Tami and Darryl would like to meet with Jim Henderson to review the proposal further before agreeing to access from Dowd's. and Laurel will set up a meeting with all interested parties.

We discussed the possibility of accessing the trees from the north side of the cemetery which but it is unknown who owns this land or if it is a designated wetland area. More information will be necessary to determine if this is even an option for access. Dina has agreed to check on the map and deeds to determine who owns the land in question.

Funding for the project was also discussed. We may need to use additional funding above our current 2016 budget to get this job done in 2016. It was also proposed that we could approach the Lyme Foundation for a grant and Michael has agreed to look into this.

Respectfully submitted,
Laurel Ross, chair
