

CLASS V ROADS STUDY COMMITTEE  
MINUTES  
JUNE 16, 2015

Approved

Present: Bill Malcolm, Dan Brand, Mimi Weinstein, Jim Jenks, Mike Smith, Sue MacKenzie

Meeting called to order at 6:03  
Minutes from June 2, 2015 approved

1. Noted new owner of the property at the "Slump" on River Road.
2. River trip with engineers, Geotechnical engineer now feels a little better about keeping the road open. Mike Willis does feel we do have time, not long but some time to find a solution.
3. River Trip with DES. Noted 2012 repair stands out amid natural riverbank. Colles Adams advised cutting trees in this section of bank. Compared to private properties repaired in 1998, that look very natural and much more attractive. Also looked at South end of River Road near the town line and discussed options for stabilizing river bank.

CLD will be coming to the Select Board meeting 6/18/15.

4. Goose Pond Road Project is ready to go out to Bid.
5. Parking Lot Expansion: Blacktop changed grades to have water drain to each catch basin instead of gradual drain from north to south. Question if this will be a problem for winter maintenance.
6. Discussed the possibility of Rip Rapping below the "Slump". There are many difficulties to any remedial measures. We will be putting rebar markers in the area to monitor any ground movement with the laser.
7. River Road Bridge over Hewes Brook. Have asked engineers to put a rush on this. Need to estimate total cost for bridge replacement, AIT:

	Deck Removal	\$71,000
	Permits	\$12,500
	Abutments	\$ ?
Concrete	Town Costs	\$ ?
Excavation		

8. Discussed the need to estimate cost of bringing all roads up to grade to figure future funding. All emphasized importance of road maintenance and preventive maintenance.

Meeting adjourned at 7:10  
**Next Meeting July 7, 2015**  
Respectfully submitted,  
/s/ Susan MacKenzie
